RANGE TARGET STAND INFORMATION – ROBERT ADAMS

TARGET KNOCK-OFF STANDS

After seeing parents improvise a stand for their kids using a 22 cal. RF Rifle to shoot off coke cans I was inspired to build some target stands for that purpose. The design was made to make it easy to repair the damage caused by low shots. There are two horizontal top boards. The top board is expected to be replaced most often due to low shots. The bottom board would require replacement less often. The legs almost never and the steel frame is very low to avoid any damage.

The target elevation on top of the stand was set to allow the fired bullet to strike the impact berm. Firing at targets on the ground causes skip ricochets. Below is how to use the knock-off stand.

These stands were designed and built by Red Brush members, Robert Adams and master craftsman Bryan Bredhold.

Please do not use center fire guns because only few low shots will put the stand out of service. Also, please do not place it at long distances using centerfire rifles where a low shot could cause serious damage to the stand. The intended use is with 22 Rim Fire cartridges.

WHY WOULD ANY RED BRUSH MEMBER DO THIS???

A Bay #1 knock-off stand was seriously damaged on purpose by someone using stand legs as the target. Both legs were shot up leaving splinters for the next person. A large cal. hit on the frame caused a deep dent and the leg will forever be difficult to replace. Another stand was hit by two 223 rounds on bay #4.

If you see this type of abuse, get an ID and report it.

FROM THE GROUNDS CHAIRMAN, JEFF WEBBER

Hello Everyone,

As many have noticed, we have made a lot of improvements to the range over the last month. I want to thank everyone who helped with gate duty.

We went thru all the front bays and added drainage and new drain pipe under the road. On pistol bay 1 we moved a mountain to raise the West berm, cut the bay floor and added ballistic sand to the back berm.

The new pistol bay 1 structure is complete with only a few electrical details to be completed.

There have been too many projects to list here in the newsletter, but I wanted to let everyone know we have made great strides improving our range, please enjoy.

Also, I would like to give a shout out to Darrin McClellan and his crew at Aigner Construction for going above and beyond on this last project.

For the September workday, we are going to do a lot of painting along with the usual weedeating. I also have a need for an electrical crew. Calling all sparkys, bring your tools. We will be piping a new run to the new 500 shelter and getting it wired up.

As always, I want to thank everyone who has come out to help and made our range what it is today.

See you on the Range.

Jeff Webber

LOST AND FOUND

Members continue to leave items behind at the range, and other members are really great about finding and reporting them to me.

Please notify me if you lose or leave something valuable at the range. The same goes for finding other member's items. Unfortunately, I get both calls (finding and losing), but very few that connect.

If you take possession of found property, it must be reported within 24 hours.
